

POSIDON
POLLUTED SITE DECONTAMINATION PCP

The state of the art: presentation of innovative and advanced commercial solution and relevant R&D&I projects

interested economic operators

POSIDON has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement N.776838

OPEN MEET-THE-MARKET EVENTS:

- allow the consortium to gain better insights into the market concerning state-of-the-art technologies and ongoing developments;
- enable networking and B2B (business-to-business) interactions and increase the opportunities for industries to form fit-for-purpose consortia and to take part in the envisaged procurement;
- check the viability of the scope of the challenge and the range of deliverables to be procured under R&D contracts;
- identify and mitigate market risks potentially able to endanger business goals and supplier performances;
- ultimately improve the PCP sustainability as the procurement preparation is enriched with stakeholders feedback.

HOW TO JOIN US! (SUPPLY SIDE)

OPEN MEET-THE-MARKET EVENTS organized:

- 7 th of June 2018 in Area Science Park, Trieste (Italy)
- 21st of June 2018 in Bilbao City Council, Bilbao (Spain)
- 25th of September 2018 in Brussels (Belgium)

QUESTIONNAIRE

A survey to collect relevant information and feedback from the market about the scope of POSIDON PCP and the technology state of the art.

Companies and other market participants are cordially invited to fill out the Open Market Consultation Questionnaire to express their feedback about the innovation challenge and PCP setup.

Open until 30 September 2018

HOW TO JOIN US! (DEMAND SIDE)

POSIDON continues its work :

- for inclusion of potential public authorities as procurers
- stimulating the public demand aggregation processes

in order to prepare for the future cross-joint border PPI, which is the implementation of decontamination on site.

CALL FOR INTEREST

to identify polluted soil owners interested in innovative and cost-effective solutions for brownfields decontamination.

It is addressed at public procurers, soil owners and management authorities involved in the procurement chain interested in new solutions for brownfield decontamination in an innovative and cost-effective way.

Open until 30 November 2018
